Check Favorites
Version 1.7
*"The best little Favorites utility
around!"*

PRODUCT FEATURES

- *Multiple links can be checked at the same time*
- *Favorites can be exported in a variety of formats including the standard "Bookmark" format*
- *Integrated Browser allows quick and easy browsing of Favorites, and can block annoying pop-up windows*
- *Built-in Protocol Handler allows links to be ripped and checked from existing pages on the Internet*
- *All bad/broken links can be deleted in a single action*
- *Customizable timeouts allow for slower sites to be checked correctly*

JRTwine Software's *Check Favorites* is an application that is designed to help users maintain their list of Internet Explorer® Favorites. It also contains additional features that can help web page authors check the validity of links on their web sites and files.

Multi-threaded Design

Check Favorites can check up to 32 links simultaneously.

Integrated Internet Browser

An internal browser allows users to manually check links that require additional authentication information. The Internal Browser can optionally block pop-up windows.

Drag-And-Check

The Drag-And-Check feature allows you to quickly navigate an entire web site and check all of its links.

Export Features

Users are able to export their list of Favorites in a variety of formats.

The *checkfavs* Protocol Handler

By use of a built-in Internet Explorer Protocol Handler, users can easily check just about any accessible page by using familiar URL syntax within Internet Explorer.

File Support

Links can be extracted from a normal files and checked easily

Full-Featured Installer

Complete install/uninstall support.
